

TOGETHER WE SWEEP THE WORLD CLEAN

EcocycledBrush

MADE FROM 100% RECYCLED PLASTIC

TOGETHER WE SWEEP THE WORLD CLEAN.

Our planet. We need to look after it together. And we can't do that by becoming stuck in the past. Wooden brushes might seem like a good idea for the environment, but to obtain the wood, we need to fell trees.

That's why Falconbrush has developed the brandnew Ecocycled brush, made from 100% recycled plastic. One brush contains between 375 and 875 grammes of plastic waste – that's the equivalent of 15 to 35 bottles that would otherwise pollute the environment.

The Ecocycled brush isn't just stronger and capable of higher performance, but also more sustainable than your typical brush. Choose from a wide selection

of different brushes for a wide range of purposes, and help make a difference. A real difference.

For every brush we sell, we donate a percentage to Go Forest.

The Ecocycled Falconbrush. Together, we sweep the world clean.

By using Ecocycled Brush, you save the sea

The brush block is made from high-quality, recycled material derived from plastic that has made This is an important step towards reducing the use of raw materials and makes a contribution to the circular economy.

Alongside each product in this catalogue, we've indicated

the number of recycled plastic bottles used in production. Some of our range is made from 100 per cent recycled material – both the brush block and

the bristles. We aim to move towards 100% recycled material for all of our products.

The Ecocycled brush, an environmentally friendly brush that delivers great cleaning results. Scan to learn more about our sustainable story:

High performance brushware

FalconBrush offers a wide range of brushes that are suitable for use in divergent areas: car washing, industry, transport and automotive, shipping, emergency services (fire service, police), roadworks, cleaning, agriculture, construction, non-food, retail, etc.

Where tradition and technology meet...

FalconBrush has been designing and selling brushes for nearly a century, working from our plant in Izegem, the historical heart of Belgium's brush industry.

Today, we employ sustainable technologies and materials to produce our brushes, ensuring outstanding quality for our premium label.

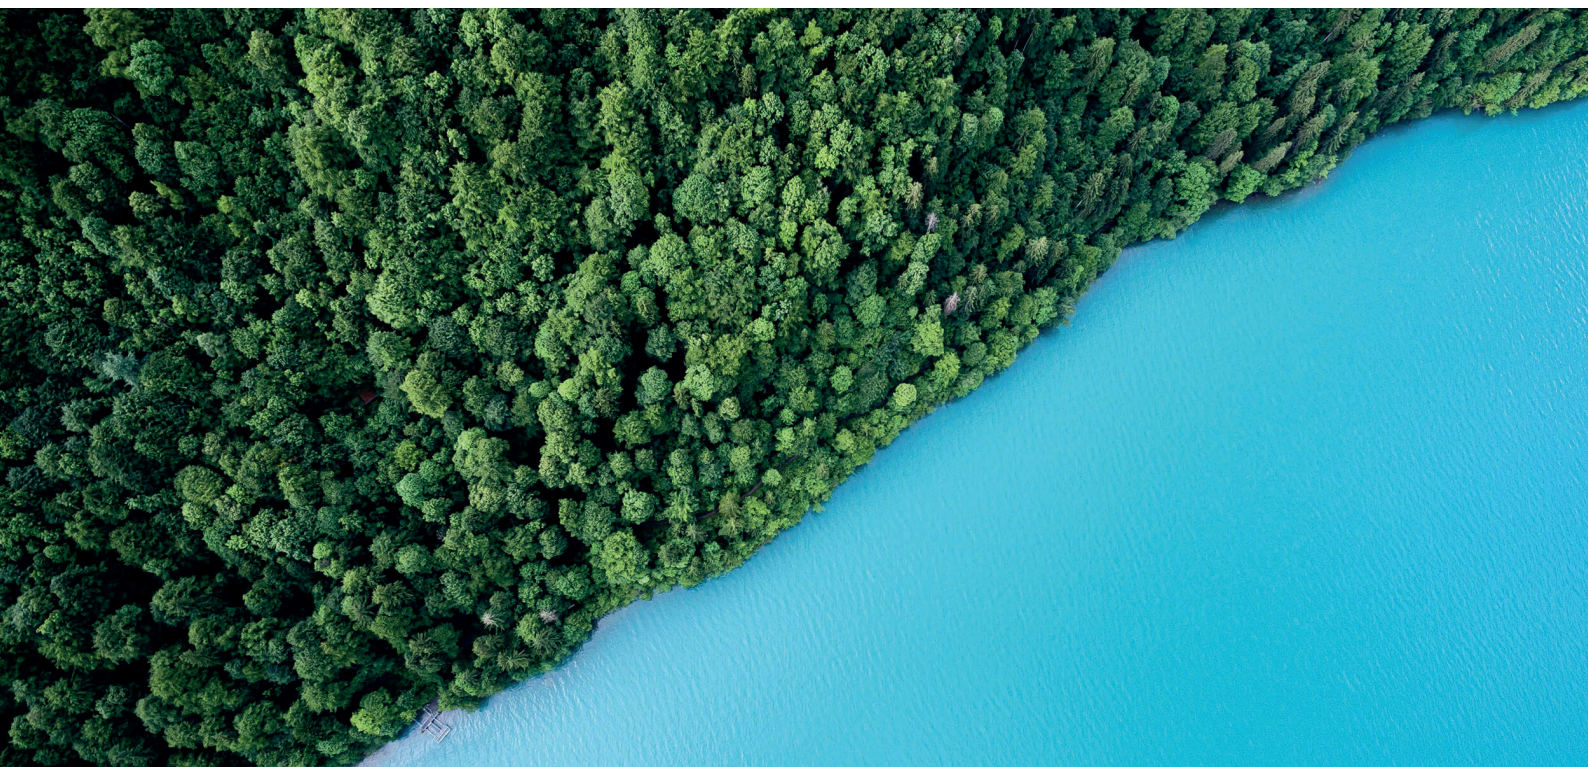

We plant trees with impact.

Forests help to slow the pace of climate change and are the most significant reservoir for biodiversity. Sadly, deforestation weighs heavily on our planet. With this in mind, Go Forest offers low-threshold, transparent solutions for planting trees with impact. Let's come together to plan(t) a greener future. Not just for us, but for future generations as well.

Choose from a wide selection of different brushes for a wide range of purposes, and help make a difference. A real difference.

For every brush we sell, we donate a percentage to Go Forest.

Ecocycled Falconbrush.
Together, we sweep the world clean.

Material

Horse hair blend

Fine animal hair from horse tails. Suitable for fine, dry dirt and dust. Used primarily for high-quality brooms and sweepers for smooth, dry floors, shoe and shining brushes and eco brushes.

Pig hair blend

Stiff, thick animal hair from pigs with a natural, mottled colour. Used primarily for eco brushes, carpet brushes, clothes brushes, bath/hair/nail brushes and for technical and rotating brushes.

PET

Synthetic fibres made from raw materials with outstanding mechanical properties. Used primarily for brooms, sweepers and road brooms.

Union

A hard, robust, heat-resistant blend of bassine and tampico fibres. Used for domestic and dishwashing brushes, washing and scrubbing brushes, scrubbers and washers.

PPN

Wear-resistant, synthetic fibre as a more cost-effective alternative to nylon. Primarily used for washing and scrubbing brushes, scrubbers, washers, and toilet and technical brushes.

PBT

Wear-resistant and food-safe synthetic brush with a temperature resistance up to 120 °C. Suitable for use where a variety of dishwashing, washing and bottle brushes are needed for domestic and commercial use and in catering.

Tampico

A hard, robust, heat-resistant blend of fibres from the Agave plant. Used for domestic and dishwashing brushes, washing and scrubbing brushes, scrubbers and washers.

Bassine

Stiff, thick palmyra fibres. Suitable for coarse, dry, moist and oily dirty surfaces. Primarily used for heavy-duty brooms, scrubbers and technical brushes.

ECOPET

Optimised and recycled version of the natural coconut fibre.

RC PLAST A/S

DATA SHEET: 541-287 PP Compound MFI 40/20 Black

This PPH is recycled from first class industrial non woven. The non woven itself is processed from the raw material which is 93 % virgin high quality PP Homopolymer and 7 % PE. The technical datasheet of the prime material is as follows:

PROPERTY	UNIT	VALUE
MECHANICAL PROPERTIES		
Melt flow index	gr/10 min. 2.16 kg/230 °C	40
Tensile strength at yield	MPa	35
Elongation at yield	%	9
Flexural modulus	MPa	1300
Izod impact str. (notched) at 23 °C	J/m	30
Charpy Impact Str. (notched) at 23 °C	KJ/ M2	435
THERMAL PROPERTIES		
Melt range	°C	160-165
Vicat softening point (10N-50C/h)	°C	148
Heat Distortion temp. (0.46 MPa)	°C	140
OTHER PHYSICAL PROPERTIES		
Density	Kg/m3	920
Bulk density	Kg/m3	500

APPLICATIONS:

Injection moulding

PACKING:

Big bag approx. 1200 kg

Bulk approx. 25 MT

To the best of our belief we hereby certify that this product conforms to the relevant release specifications stated below. All other warranties, including those as to fitness for purpose and merchantable quality, are specifically excluded.

An advanced technology that allows the use of recycled plastic materials thus removing them from landfills and incinerators

A TRUE BENEFIT FOR THE ENVIRONMENT
